

Exceptional & Rich India MidCap Select M™

Inception date January 2017

Description

Exceptional & Rich India MidCap Select M Index [E&R India MidCap Select M] has been created to improve the statistical and scientific design flaws of the market capitalization methodology used in the S&P BSE MidCap Select Index, which is widely regarded as the best single gauge of large-cap India equities. Unlike market capitalization methodology which is risk-increasing and return-reducing owing to its concentration, the E&R is designed to own 29 large-cap India equities, and deliver higher risk-weighted excess returns while maintaining low tracking error vs. the S&P BSE MidCap Select Index.

Methodology

The methodology is based on a modern science innovation, which uses Reversion-Divergence framework to dynamically score, weight and rebalance components in a group to deliver higher risk-weighted excess returns. The method removes the conflict between Efficient and Inefficient market thinking, statistically normal and non-normal behavior, or in simple terms the conflict between Value and Growth investing. The methodology is not Size biased, and obviates the need for concentration and running after winners but rather adopts a slower weight readjustment compared to the S&P BSE MidCap Select Index.
